

**15-20 September 2019, Val Roseg, Switzerland**

# Ecohydrology of intermittent rivers: from theory to practice

**A TRAINING SCHOOL**

The SMIRES COST Action is organizing a Training School to explore the ecohydrology of intermittent rivers.

In the Val Roseg valley in the **Swiss Alps**, cutting-edge field, lab and analytical methods will enable us to study how environmental variability shapes aquatic-terrestrial biodiversity in dynamic rivers.

## You'll learn how to...

- ...collect **hydrological data** and use this to characterize flow regimes
- ...make quantitative **observations** to characterize IRES habitats
- ...sample **aquatic** and **terrestrial communities** from wet and dry IRES
- ...**analyze** data to identify biotic responses to abiotic variability.

## Our trainers

Amael **Paillex**, ECOTEC, Switzerland  
Chris **Robinson**, Eawag, Switzerland  
Eric **Sauquet**, Irstea, France  
Ilja **van Meerveld**, UZH, Switzerland  
Michael **Doering**, ZHAW, Switzerland  
Rachel **Stubbington**, NTU, UK

## We invite applications

We will give priority to **early career researchers** (MSc to post-doc). We can reimburse trainees from COST countries, NNC institutions and European RTD organisations: check [here](#).

## Costs

There are no course fees. Expenses related to travel, accommodation, and meals will be reimbursed (up to 650€ depending on country) once the Training School is completed.

## HOW TO APPLY

Send **one pdf** with a **2-page CV** and a **1-page cover letter** explaining why you want to attend and how you and your research will benefit from attending this Training School to [robinson@eawag.ch](mailto:robinson@eawag.ch) by **12 July 2019**. We will select 15 trainees, with our decisions supporting COST gender and geographical inclusiveness policies.
